1 Situation

Introduction

The following precautionary measures of the University of Applied Sciences of the Grisons include measures for the following areas that must be implemented with the cooperation of all members of the university (employees, lecturers, students).

Objective of these measures

The objective of the measures is to protect all members of the University of Applied Sciences of the Grisons (employees and students) and their relatives against being infected by the coronavirus. Individuals deemed to be especially high risk also have to be protected as well as possible. In accordance with the mandate from the federal government and the canton, the University of Applied Sciences of the Grisons is endeavouring to play its part in keeping new cases at a low level.

Rules of conduct

The following rules of conduct are to be consistently observed by all employees, students and guests:

1. Employees, students and participants are aware of their role in the transmission chain and adhere to the rules of conduct and hygiene of the FOPH.
2. Appropriate protection for individuals deemed to be at especially high risk.
3. Ventilate offices and classrooms without technical room ventilation for at least five minutes every hour (to be done by employees, lecturers or students).
4. A limited number of carbon dioxide measuring devices are available to determine the CO₂ content in the office and classroom. These can be borrowed from the services.
2 Individuals infected with COVID-19 at their place of study or workplace

Employees and students who exhibit typical signs of the coronavirus must remain at home and contact the Crisis Management team of the University of Applied Sciences of the Grisons. If you are already in the buildings of the University of Applied Sciences of the Grisons, please contact the Crisis Management team immediately.

Crisis management of the UAS Grisons: notfall@fhgr.ch or tel. 079 565 17 14.

3 Dealing with particularly vulnerable persons

Lecturers, students, and external persons who are particularly at risk are encouraged to discuss this with the responsible persons and to discuss possible solutions. The contact person for lecturers/lecturers is the Director of Studies, for employees the staff.

4 Library operations

The library opening hours can be found on the homepage of the UAS Grisons.

5 Canteen/catering

The Compass Group protection concept applies in the canteen. The protection concept is based on the protection concept of the hospitality industry.
